## NEW BOOKS

Of the approximately 200 new books received by the Army Medical Library each month a few are being chosen, more or less at random, for brief mention here.

**HARLEY, DAVID.** Medico-legal blood group determination: theory, technique, practice. London, William Heinemann, Ltd., 1943. 119 p.

The constitutional serological differences in the four blood groups discovered by Landsteiner and others, and their demonstrated hereditary nature has become of increasing importance in connection with the problem of disputed blood relationships. The principles and practices of the application of this knowledge are described as well as the extent to which it is applicable to the medico-legal determination of non-paternity. A blood test may offer conclusive proof that a certain man could not be the father of a particular child, but can never prove that he is a father.

**HOWLES, JAMES K.** A synopsis of clinical syphilis. St. Louis, C. V. Mosby Co., 1943. 671 p.

This text describes in a systematic manner the present-day knowledge of the occurrence, lesions, diagnosis, treatment, and the many other angles of the subject. The systemic and regional manifestations of syphilis are discussed and illustrated by numerous photographs of cases from the author's personal practice in the several hospitals of Louisiana. The familial and public health aspects of syphilis are discussed as well as the history of its origin and rapid spread after the first voyage of Columbus.

**LEWIS' medical & scientific lending library.** Catalogue. New ed. rev. to the end of 1937. Part I. Authors and titles. London, H. K. Lewis & Co., Ltd., 1938. 168 p.

This lending library was established in 1948 and now has some 60,000 books including duplicates in circulation. Except for a very few periodicals, reports, and annuals, the collection is composed exclusively of treatises, digests, compendia, text and reference books, published in the English language. The cost of borrowing one book at a time begins at 21 shillings per year and this one book unit price decreases gradually to a minimum of 11 shillings annually for each book beyond 30 borrowed at one time. Each book may be kept as long, or exchanged for another as frequently, as desired. The collection is kept up to date by the purchase of new editions and withdrawal of the old ones. The Catalogue is arranged by authors and titles and in the form of a classified index of the subjects, with the names of authors arranged alphabetically under each heading. A bi-monthly list of new books and editions is issued to subscribers and the surplus volumes withdrawn from circulation are sold at reduced prices.

**REYNOLDS, REGINALD.** Cleanliness and godliness, or the further metamorphosis. London, George Allen & Unwin, Ltd., 1943. 267 p.

An amusing and instructive account from earliest times to the present (with innumerable citations and anecdotes) of human elimination and the development of the water closet and methods of sewage disposal.

**WALKER, KENNETH.** Diagnosis of man. London, Jonathan Cape, 1942. 255 p.

It is by a knowledge of what man is that it may be possible to learn what he may become. The nature of man is examined in the light of what is known of the cell, the endocrine glands, the brain, nervous system, medical psychology, consciousness, religions, the Church and mystical Christianity. This birds-eye view is intended to encourage the ordinary man to think about matters that hitherto he has left to the experts.

**WHITE, AMBER BLAND.** Worry in women. London, Victor Gollancz, Ltd., 1941. 320 p.

This book is intended to help women overcome their tendency to worry, and to take a juster view of themselves and find more happiness in life. A general description of worry and the development of anxious temperaments is followed by ways of assuaging worry. An account is given of conscience and how it grows and does its work, and finally particular problems are discussed, especially those concerned with marriage and the relations of parents and children.

CURRENT LIST OF MEDICAL LITERATURE is published weekly, and lists of RECENT BOOK ACQUISITIONS are issued several times per year as supplements. The subscription price for both is \$5.00 per year in the United States and \$5.50 per year in other countries. The Recent Book Acquisitions may be obtained separately at \$1.00 per year.
